Full Australian working rights – no work-hour restrictions (dependent of Subclass 500 visa holder)

PROFESSIONAL SUMMARY

Results-driven cybersecurity graduate (BSc Hons, First Class) with hands-on experience across security operations, governance/risk/compliance (GRC) and penetration testing. Skilled in vulnerability assessment and network security testing using Burp Suite, Nmap, Metasploit and Wireshark, and in implementing ISO/IEC 27001 information security management systems (ISMS). Jr Penetration Tester (TryHackMe) and ISO/IEC 27001 Associate. Now based in Melbourne with full working rights, seeking an entry-level SOC/Security Analyst, GRC or IT Support role to strengthen organisational security posture.

TECHNICAL SKILLS

- **Security Operations & Monitoring:** vulnerability assessment, network security testing, incident response fundamentals, log analysis
- **Penetration Testing Tools:** Burp Suite, Nmap, Metasploit, Wireshark, Gobuster, SQLMap
- **GRC & Frameworks:** ISO/IEC 27001, ISO 9001, NIST Cybersecurity Framework, SOC 2, risk assessment, internal audit, compliance
- **Operating Systems:** Kali Linux, Linux, Windows, macOS, Android
- **Cloud:** AWS (Cloud Foundations, Cloud Operations, Cloud Security Foundations)
- **Programming & Scripting:** Python, Bash scripting, basic JavaScript
- **Web Application Security:** OWASP-aligned web application penetration testing

CERTIFICATIONS

- **Jr Penetration Tester – TryHackMe** (2025)
- **ISO/IEC 27001 Information Security Associate – SkillFront** (2025)
- **Network Security Engineer – EC-Council** (2024–Present)
- **AWS Academy – Cloud Foundations, Cloud Operations, Cloud Security Foundations, Data Center Technician, Machine Learning Foundations** (2024–Present)

PROFESSIONAL EXPERIENCE

Cyber Security Consultant

Apr 2024 – Jul 2024

ING Skill Academy

- Designed and delivered comprehensive cybersecurity demonstrations across multiple security domains for students and beginners.
- Conducted detailed training sessions and interactive workshops, improving participants' practical security knowledge and hands-on skills.
- Communicated complex security concepts clearly to non-technical audiences, building foundational awareness of threats and defences.

ISMS Intern

Aug 2024 – Dec 2024

Nepal Realistic Solutions

- Assisted in implementing ISO/IEC 27001 information security management standards across the organisation.
- Conducted risk assessments and identified security gaps across IT assets and business processes, supporting remediation planning.
- Participated in internal audits and compliance checks to support ISMS certification readiness.

ACADEMIC PROJECTS

Decentralized Document Storage & Management System github.com/hrk18/DocSecure

- Built a React Native, Ethereum and IPFS based decentralised document management app enabling tamper-proof, on-chain document verification.
- Integrated IPFS (Pinata) for decentralised storage, reducing centralised storage dependency by 80% and improving data integrity.

- Developed smart contracts with Hardhat, achieving sub-3-second local blockchain confirmation for document hash registrations.
- Implemented public/private visibility controls supporting role-based, user-level document access security.

EDUCATION

BSc (Hons) Networking and IT Security – First Class

2022 – 2025

Islington College (affiliated with London Metropolitan University)

Higher Secondary (Science) – NEB

2019 – 2021

National School of Science (NIST), National Examination Board
